**Teams desperately need a push start. Can you help?  
For how long can you ride a Bike?  
One, maybe two hours ..... well students in The Junior  
School will be riding specially designed bikes for 14  
hours continuously!!  
*Read on for more ...***

The 19th RACV Energy Breakthrough will be energising Maryborough in Central Victoria between 18 - 21 November. It is without doubt, one of the most exciting and important events on the Victorian calendar by bringing together participants from both the city and the country. It is more than an event, it provides real life challenges in Science, Technology and Environmental Education, with a particular focus on transport and a sustainable future. The Junior School has entered two teams in the Human Powered Vehicle Primary Division. Approximately 22 students from Year 6, assisted by staff and parents, will be representing The Peninsula School.

## How can you help?

1. Corporate or personal sponsorship of the team is urgently needed.
2. Donations of energy foods and drinks would be greatly appreciated. Items such as muesli bars, packets of glucose sweets such as snakes, sports drinks and bottled water will assist with the "refuelling" of riders.

If you can assist in any way, please contact Robert Ogle.  
Phone (w) 9788 7879 or email [rogle@tps.vic.edu.au](mailto:rogle@tps.vic.edu.au)
